

State of the States: Progress in State Data Systems from 2013 to 2015

Laura Hudson & Donna Spiker

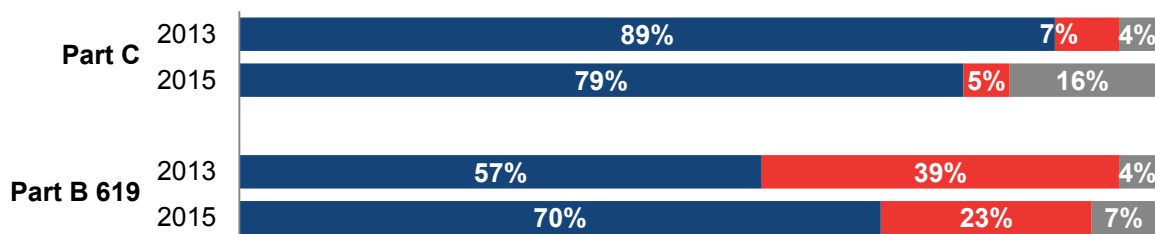

Child-Level Data

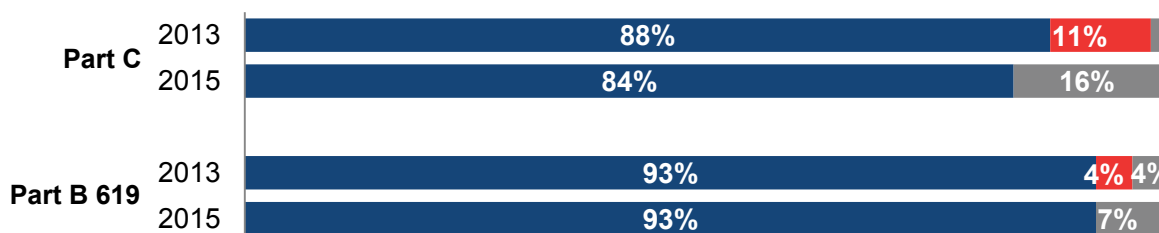

1. State has at least one electronic data system that contains personally identifiable child-level data about children who are receiving services.

2. Individual child-level data elements reside in one system or have been linked.

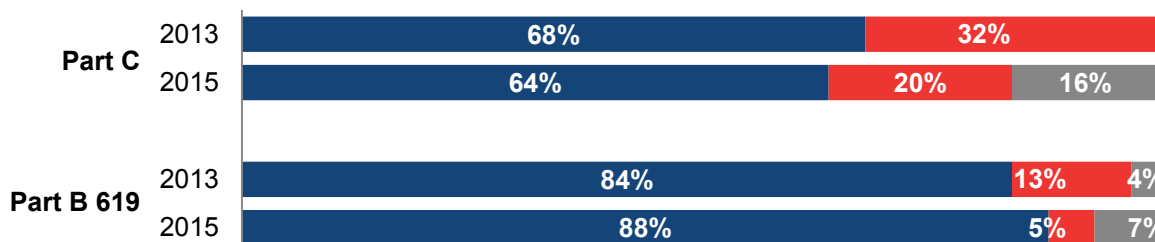

3. State data system(s) uses a unique identifier for children receiving services.

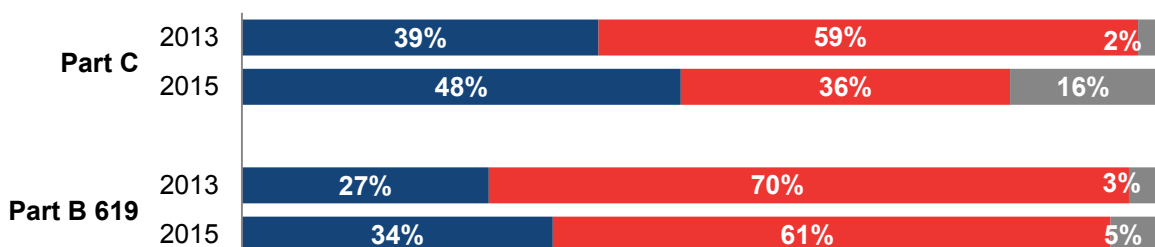

Workforce-Level Data

4. State has at least one electronic data system that contains personally identifiable workforce data about those providing services.

5. Child-level data have been linked to workforce-level data.

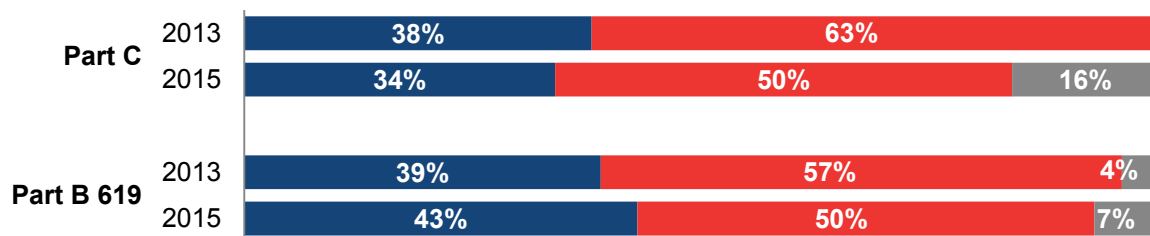

Data Linkages and Data Governance

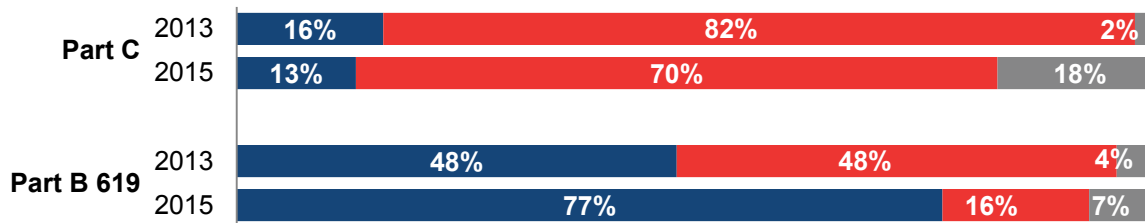

6. State data systems that contain data about children receiving Part C and Part B 619 services use the same unique child identifiers.

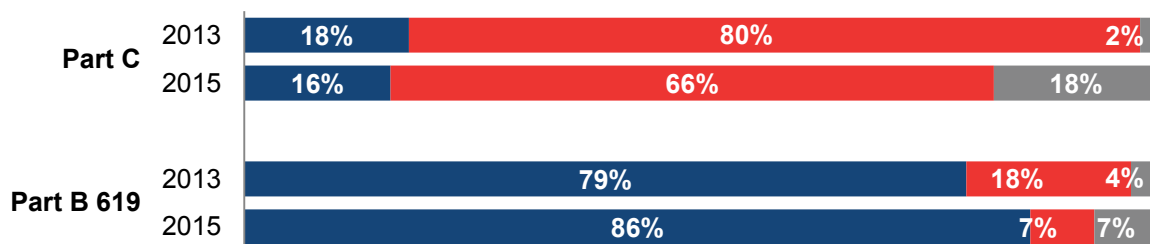

7. At least some child-level data are in the same data system or have been linked to child-level data across Part C and Part B 619.

8. At least some child-level data are in the same data system or have been linked to data from other early care and education (ECE) programs.

9. At least some child-level data are in the same data system or have been linked to data from general education K-12.

10. State has a data governance body whose scope of responsibility includes data about children receiving services.
